

The Florida Department of Education requires public institutions to retrospectively report course offerings. Below is a list of institutions that have provided instruction using the approved Public Safety Telecommunication Framework (P090101). If you have taken a public safety telecommunication course at one these educational institutions during the given approved years and have 24 months of supervised full-time experience, you are eligible to apply for the Florida 911 Emergency Dispatcher Certification. Please visit the Department of Education's website for a comprehensive list of approved institutions that have taught this framework in the most recent reporting year.
